

I can draw well.	I've been trained to draw with masses.	I think that I would like to use this system frequently.	I found the system unnecessarily complex.	I thought the system was easy to use.	I think that I would need the support of a technical person to be able to use this system.	I found the various functions in this system were well integrated.	I thought there was too much inconsistency in this system.	I would imagine that most people would learn to use this system very quickly.	I found the system very cumbersome to use.	I felt very confident using the system.	I needed to learn a lot of things before I could get going with this system.	I found the tools of the system worked well together.	The ellipse position feedback was useful.	The silhouette feedback was useful.	The fast "NN" preview image was useful.	The coarse preview of the generated image with the color choices was useful.	I was able to draw the specifications as I desired.	The generated image from Assignment 1 closely matches my specifications.	Which of the systems was the easiest to use?	Given 3 images (ask surveyor to view them), which one is closest in terms of pose?	Given 3 images (ask surveyor to view them), which one is closest in terms of color?	Given 3 images (ask surveyor to view them), which one resembles the target image the most?	The target image number for Manual Search:	The found closest match image index	The target image number for Assignment 2:	The target image number for Assignment 3:
